Some Problems Associated with Bessel
Operators

Prof. Huoxiong WU (伍火熊 教授)

Time: 10:00-11:00, October 12 (Friday) 2018

Venue: Room 111, Center for Applied Mathematics

Abstract: In this talk, I'll present some recent results on singular integrals associated with Bessel operators, which include the boundedness and compactness of commutators for Riesz transform associated with Bessel operators in Lebesgue spaces and Morrey spaces, the variation and oscillation inequalities for Poisson and heat semigroups, Riesz transform in Bessel setting.
