Carleson Measure of Mobius Invariant Function Spaces

Prof. Zengjian LOU (娄增建 教授)

Shantou University (汕头大学)

Time: 16:00-17:00, November 9 (Friday) 2018

Venue: Room 112, Center for Applied Mathematics

Abstract: In this talk, we consider the problem: when Möbius invariant function spaces are continuously embedded in tent spaces. It is known as Carleson measure problem. We will introduce the recent development of Carleson measure for some well-known analytic function spaces, and present our work on Carleson measure for $BMOA$, Bloch space, Q_p spaces, Z_p spaces and Dirichlet space.
